Journal of Neuroscience Methods, 41 (1992) 273–274
Elsevier Science Publishers B.V.

Contents of Volume 41

Number 1 – January 1992

Research papers

3-D Computer animation of electrophysiological responses
R.A. Palovcik, S.A. Reid, J.C. Principe and A. Albuquerque, Jr. (U.S.A.) 1

Sensitive method for HPLC determination of acetylcholine, choline and their analogues using fluorometric detection
J. Říčný, S. Tuček and I. Vinš (Czechoslovakia) 11

Identification of bursts in spike trains
J.H. Cocatre-Zilgien and F. Delcomyn (U.S.A.) 19

Neurobiotin™, a useful neuroanatomical tracer for in vivo anterograde, retrograde and transneuronal tract-tracing and for in vitro labeling of neurons
Q. Huang, D. Zhou and M. DiFiglia (U.S.A.) 31

A method for reliable and permanent intracellular staining of retinal ganglion cells
M. Pu and D.M. Berson (USA) 45

Explantation of fetal murine retinae to the chorioallantoic membrane of the chicken embryo
K.R. Huxlin, A.J. Sefton and J. Furby (Australia) 53

A new computer program for detailed off-line analysis of swimming navigation in the Morris water maze
D.P. Wolfer and H.-P. Lipp (Switzerland) 65

Horseradish peroxidase retention and washout in blood–brain barrier lesions
P.A. Stewart, C.R. Farrell, C.L. Farrell and E. Hayakawa (Canada, USA, Germany) 75

Fluorogold administration via microdialysis labels neurons terminating within the dialysis region
S.R. Skilling, M.A. Mullett, A.J. Beitz and A.A. Larson (USA) 85

Book review 91

Number 2 – February 1992

Research papers

Reversed-phase liquid chromatographic purification and isolation of a radio-iodinated selective probe for mu opioid receptors in the brain
M.M. Miller, B.E. Gould, D. Joshi, H.P.J. Bennett, S. James and R.B. Billiar (Canada) 93

Computer-aided two-dimensional high-resolution axon tracing: an application using the anterograde tracer *Phaseolus vulgaris leucoagglutinin* (PHAL)
W.G. Tourtellotte and G.W. Van Hoesen (USA) 101

Application of compiled BASIC in developing software for collection and analysis of neuronal firing frequency data
R.S. Skeen, B.J. Van Wie, S.J. Fung and C.D. Barnes (USA) 113

Automatic wave form classification of extracellular multineuron recordings
R.F. Jansen and A. Ter Maat (The Netherlands) 123

Computed alignment of dissimilar images for three-dimensional reconstructions
L.S. Hibbard, T.L. Arnicar-Sulze, B.J. Dovey-Hartman and R.B. Page (USA) 133

A method of in situ hybridization combined with immunocytochemistry, histochemistry, and tract tracing to characterize the mRNA expressing cell types in heterogeneous neuronal populations
P. Wahle and S. Beckh (Germany) 153

Sampling fluid from slice chambers by microsiphoning
D.A. Godfrey and H.J. Waller (USA) 167

Measurement of the distribution of [^{3}H]bicuculline microinjected into the rat hypothalamus
T. Segura, D.S. Martin, P.J. Sheridan and J.R. Haywood (USA) 175

Number 3 – March 1992

Research papers

A personal computer-based spike detector and sorter: implementation and evaluation
H. Bergman and M.R. DeLong (Israel, USA) 187

An immunocytochemical method for marking microelectrode tracks following single-unit recordings in long surviving, awake monkeys
L.A. Benevento and L.B. McCleary (USA) 199
Kinetics of diffusion in a spherical cell. I. No solute buffering
N.T. Carnevale and S. Rosenthal (USA) 205
Kinetics of diffusion in a spherical cell. II. Solute buffering included
N.T. Carnevale and S. Rosenthal (USA) 217
Epi-polarization and incident light microscopy readily resolve an autoradiographic or heavy metal label from an obscuring background or second label
D.H. Rapaport, K.G. Herman and M.M. LaVail (Australia, USA) 231
Biotinylated dextran amine as an anterograde tracer for single- and double-labeling studies
C.L. Veenman, A. Reiner and M.G. Honig (USA) 239
Flattening the cerebral cortex by computer
H. Sherk (USA) 255
